DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 1. Claims 1,2,4,7-9 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application Publication 2004/0011322 to Gerhardt. Gerhardt teaches an engine having two embodiments one having port fuel injection, the other being direct fuel injection. In each of these two embodiments certain cylinders may be disabled by shutting of the intake and exhaust valves. See the abstract, paragraphs 4-7, 17,20,23,24,41,43,48 and 54.

Allowable Subject Matter

2. Claims 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed 11 November 2004 have been fully considered but they are not persuasive. In particular, regarding the 35 USC 102(e) rejection of claims 1,2,4,7-9 and 14,

Application/Control Number: 10/619,456 Page 3

Art Unit: 3747

as being anticipated by Gerhardt, applicant argues that Gerhardt does not teach variable valve actuation. The examiner's position is that being able to selectively shut on and off certain of the intake and exhaust valves is a form of "variable valve actuation", furthermore being able to continuously vary the valve timing and or duration is already known in the art. Applicant also argues that Gehrhardt does not teach a stoichiometric mixture. The examiner disagrees since Gerhardt's homogeneous mode of operation is stoichiometric, see paragraph 12. Regarding the EGR system, Gerhardt does make reference to an EGR system at paragraph 54, and since there appears to be nothing in applicant's EGR system which is unconventional, the argument that Gerhardt does not teach that particular type of EGR system is not persuasive.

5. Regarding the 35 USC 102(e) rejection of claims 9-14 as being anticipated by Yoshizawa et al, although this reference does apply to a gasoline engine (col. 5, lines 35-41) and does include a high energy ignition system (Fig. 1, 40, spark plug) it does not appear to teach selectively activating and de-activating the combustion chambers, as now claimed. For this reason said rejection has been withdrawn.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3747

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick R Solis whose telephone number is (571) 272-4853. The examiner can normally be reached on Monday-Thursday.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-3700.
